3,500 LANGUAGES SPOKEN IN THE WORLD; ENGLISH LEADS.

There are approximately 3,500 lan-
guages or dialects spoken in the
world, English leading them all in
the number of persons using the
tongue.

It is estimated that over 130,000,000
persons speak English, while 100,000,
000 persons converse in German.
Russian is spoken by some 70,000,000,
while 45,000,000 make their wants
known in French. The Spanish lan-
guage is spoken by 40,000,000, Italian
by 30,000,000, and Portuguese by 13,
000,000.

English is spoken by 4,000,000 in
the Dominion of Canada, by 3,500,000
in the West Indies, by 3,000,000 in
Australia, by 1,000,000 in East India
and by 38,000,000 in the British Isles,
not forgetting some 75,000,000 in the
United States.

German is spoken by 2,000,000 in the
United States; the same number of
persons use that language in Switzer-
land; 10,000,000 use it in Austria-Hun-
gary and 46,000,000 speak it in the
German Empire. In Belgium, where
there was a movement on foot to
make it popular, but 40,000 persons
make use of it.

French is the regular means of
communication between 2,500,000 per-
sons in Belgium; between 1,000,000
persons in the United States and Can-
ada and a similar number in Algeria,
India and Africa. It is spoken by
600,000 Swiss and the same number
of Hyattians. In Alsace-Lorraine 200,
000 persons still make use of it, and
in the mother country 38,000,000 per-
sons recognize it as their native
tongue.

STORAGE EGGS SOLD IN NEW YORK AS FRESH.

New York Firm Is Forced to Pay a
Fine of \$500.

A fine of \$500 was imposed Sat-
urday on the James Van Dyk Company,
a New York egg dealers, on their plea
of guilt to selling storage eggs as
fresh. It is the first conviction of
its kind in the State. The action
was brought by the State Depart-
ment of Health, which has been con-
ducting a crusade against the prac-
tice of misrepresenting cold storage
products.

MANY STEPS OF TANGO ARE TAUGHT.

Parisian dancing masters are now
teaching 200 steps of the tango, and
many of the more difficult steps are
being tried at the public resorts.

Afternoon tea dances are numerous,
and in the evenings restaurants which
allow the tango are crowded with
dancers. American dance tunes, some
of them of not very recent origin, are
played to a considerable extent. One
song containing the strains of Dixie
is often heard.

Occasionally the one-step and "fish"
walk, and, of course, the waltz and
two-step are danced, but preference
is given to the tango.

Col. Goethels has cabled that the
first steam vessel has passed through
the Panama canal. That means that
the engineering work is practically at
an end. The work of establishing a
permanent form of government and
administration remains. The man
best fitted to perform it is the author
of the cable.

Mr. Taft and a distinguished travel-
er now in South America will learn
with surprise that the inmates of the
Mississippi Home for Confederate
Veterans have assigned as their reason
for asking Mr. Wilson to visit
them the fact that they have never
seen a President.

There is more Catarrh in this sec-
tion of the country than all the other
diseases put together, and until the
last few years was supposed to be in-
curable. For a great many years the
doctors pronounced it a local disease
and prescribed local remedies, and by
constant failing to cure with local
treatment, pronounced it incurable. Science
has proven Catarrh to be a
constitutional disease, therefore re-
quires constitutional treatment.
Hall's Catarrh Cure, manufactured by
F. J. Cheney & Co., Toledo, O., is the
only constitutional cure on the mar-
ket. It is taken internally in doses
from 10 drops to a teaspoonful. It
acts directly on the blood and mucous
surfaces of the system. They offer
One Hundred Dollars for any case it
fails to cure. Send for circulars and
testimonials.

Address F. J. CHENEY & CO., To-
ledo, Ohio.

Sold by druggists.
Take Hall's Family Pills for consti-
pation.

THE FEBRUARY WOMAN'S HOME COMPANION

The February Woman's Home Com-
panion contains a remarkable con-
tribution entitled "Why Fifty Women
Do Not Go to Church." The author,
Bruce Barton, has made specific in-
quiries of hundreds of women on the
subject of church-going and has a
mass of concrete evidence of great in-
terest and significance. This article
is to be followed by another entitled
"Why Fifty Women Do Go to
Church."

Other notable contributions to the
February Companion are: "What I
Have Learned About Canned Foods,"
by Christine Tithune Herrick; "How
Children 'See With Their Hands'"
by Mary Heaton Vorse; "The Uses of
Biography," by Charles E. Jefferson;
"The World's Greatest Paintings,"
by Laura Spencer Porter; "What Is
the Ideal Small House?" by A. Ray-
mond Ellis; "What Every Baby
Needs," by S. Josephine Baker, M.
D., in the Department for Better Bab-
ies; and "The Fun of Garden Plan-
ning," by Frank A. Waugh.

Lively fiction is contributed in a
variety of fields by Grace Ellery Chan-
ning, Mary Heaton Vorse, Edwin L.
Sabin, Myra F. Cutler, Fannie Hea-
slip Lea, Anna McClure Sholl and
Juliet Wilbur Tompkins.

For younger readers Rose O'Neill
contributes "The Kewpies and Little
Peggy," and a Kewpie Valentine; A.
E. Swayer describes "Toboggans and
Bobsleds That a Clever Boy Can
Make;" Clara Andrew Williams and
George Alfred Williams contribute
"The Adventures of Jack and Betty."
In the Cooking, Housekeeping and
Fashion departments appear a great
variety of practical and entertaining
features. Special art features and a
musical composition complete a very
beautiful and entertaining number.

A HUMAN AQUARIUM.

A scientific examination of a man of
strange powers who has been giving
in Munich exhibitions of swallowing
frogs and fishes and bringing them
forth alive, has been reported by a
German physician. As many as
thirty exhibitions were given daily.
He first drank water by the quart,
then swallowed about twenty frogs
or gold fish in succession, and while
serving as a living tank for these ani-
mals he moved about freely and con-
versed. Then, by an inaudible ef-
fort, he caused the creatures to es-
cape singly, after which he brought
up the water through a tube, aiding
with pressure by his hands. The ex-
hibitor was a quiet, natural appear-
ing man of sixty-three, small but
well-nourished, and his powers of ru-
mination, evidently inherited, was
increased when a boy as a trick, and
later as a source of income. The X-
rays revealed only ordinary healthy
organs. The stomach seemed even
smaller than normal, and the diges-
tive organs and esophagus showed
nothing unusual. It was concluded
that the stomach simply had abnor-
mal elasticity.

In 1912 more than 2,000 miles of
railway were constructed in British
Columbia.

AMERICANS SHOULD DEVELOP IMPROVED POTATOES.

American progress in the develop-
ment of improved varieties of pota-
toes has not been satisfactory as
compared with the progress of lead-
ing European countries is the state-
ment of the Bureau of Plant Industry
of the Department of Agriculture in
Department Bulletin No. 47, "Lessons
For American Potato Growers From
German Experiences."

The best European varieties possess
a better flavor, color and texture, par-
ticularly for boiling and frying, but
these do not succeed when intro-
duced into the United States. If pri-
vate growers would engage in this
work as they have in Great Britain,
Germany and Austria, they would find
it a fascinating industry and would
undoubtedly make notable achieve-
ments.

In America we have much to accom-
plish in breeding a potato with a
greater starch content. Our pota-
toes are now lower than the German
varieties by from 4 to 8 per cent.

Our climatic conditions in America
are so diverse that we need varie-
ties of potatoes adapted to special
localities. Particularly do we need a
heat-resistant strain that can more
successfully withstand the high summer
temperatures. Disease resistance is
another quality that has been bred
into certain foreign sorts, but is so
lacking in ours that we have to quar-
antine absolutely certain foreign
types that might bring disease with
them.

The breeding of potatoes for dif-
ferent kinds of cooking might even be
found profitable. A variety specially
suited for baking is needed; another
for frying; a close-textured tuber is
in some demand for salads. The house-
wife to-day finds it necessary to waste
much good material in preparing her
potatoes for the table, particularly
the irregular, deep-eyed sorts.

The use of commercial fertilizers,
universally in Germany, is unknown
in our Western potato districts. Cer-
tain of our districts in Maine, New
York and other Atlantic trucking belts
have already found it to their profit
to use more fertilizer, and potato
growing is most prosperous in these
sections. This should become more
universal.

Crop rotation is of fundamental im-
portance to the potato crop in con-
trolling disease and maintaining pro-
duction, but in the United States only
the beginning of an ordered system has
been made. Germany has a rotation
of from 3 to 7 years between potato
crops. Nor has the importance of
green manuring yet been fully appre-
ciated in this country.

The problem of securing disease-
free seed has been met in Germany
by an official inspection, which re-
sults in certificates being issued only
to owners of disease-free crops. Such
a plan in the United States would be
better if carried out by the co-opera-
tion of potato-growers associations,
the State experiment stations, and the
United States Department of Agricul-
ture, rather than through legal en-
actment.

Woman's Danger Signals

Hot flashes—dizziness, fainting spells, headache, bearing-down
feeling and ills of a kindred nature—are nature's danger signals.
The female disturbance or irregularity back of these calls for help,
should have immediate care and attention. Otherwise the delicate
female constitution soon breaks down.

Dr. Pierce's Favorite Prescription

for women has been lending its health restoring aid to thou-
sands of women for years throughout its long life.

This wonderful remedy imparts strength to the entire system—
particularly the female system. Nerves are refreshed. The "stale",
overworked, run-down housewife, and the weary care-worn
mother of a family will gain strength from this famous prescription which
40 years of experience has proved its effectiveness—in liquid or tablet form.

DEALERS IN MEDICINES.
